Chief Financial Officer Joins Ultra Tech Pipe

(Port Washington, WI...7/14/08) Terry Skebba has joined Ultra Tech Pipe as chief financial officer. Skebba will assume all financial responsibilities for the company, including managing the accounting department and directing human resources. Skebba will work out of the 110,000-sq. ft. manufacturing facility, which includes various abrasive-resistant pipe raw materials. The plant produces about 400,000 feet of pipe per year, plus thousands of system components. Ultra Tech is a leading manufacturer and supplier of complete abrasion-resistant pumping systems in the United States.

Skebba has a career of about 20 years in accounting, finance, analysis, strategic planning and related responsibilities. His most recent position was CFO at a Waukesha energy company and he previously worked at a steel products manufacturer. Skebba is active in community service, which was a factor in his joining Ultra Tech.

"Ultra Tech has a great reputation in the community and a history of giving back. Add to that their market position and long history of success, and it was easy to decide to join the company", said Skebba.

Since its inception in 1989, Ultra Tech has been a global leader in the design, manufacture, distribution and service of safe, quality abrasion-resistant piping systems and accessories. Headquartered in Port Washington, Wisconsin, USA, the company offers complete piping products and solutions for both standard and specialized high-abrasion applications, such as mining, coal fired power generation, powder and bulk solids, foundries, mills and a variety of other applications. Ultra Tech is a division of Construction Forms, Inc., a global leader in concrete pumping systems. For more information, call 800-626-8243 or visit www.ultratechpipe.com.
